Kondavaripalli Harshavardhan Reddy

harsha2378reddy | Harshavardhan | harshavardhanreddy2378@gmail.com | +9849090625

OBJECTIVE

To become a successful professional in the field of Electronics and Communication Engineering and to work in an environment which encourages me to succeed and grow professionally where I can utilize my skills and knowledge appropriately.

WORK EXPERIENCE

Embedded Systems & C Programming Trainee| Vector India, Hyd JUN 2026 – Present

- Currently undergoing training in C programming and Embedded Systems.
- Learning C programming, pointers, arrays, functions, bitwise operators and problem solving.
- Developing programming skills through practical coding exercises and technical assignments.

VLSI Design & Chip Architecture Intern NOV 2025 - MAR 2026

- Gained basic understanding of VLSI design flow and digital electronics.
- Learned fundamentals of IC design concepts and semiconductor technology.

Industrial Training – Smile Electronics Pvt. Ltd. DEC 2022 - JUN 2023

- Gained hands-on experience in basic electronics components, circuit testing, and troubleshooting.
- Learned practical exposure to electronic devices and industrial working environment.

PROJECTS

Performance Analysis of MAC Unit Using Various Parallel Adders

- Designed and analyzed a Multiply-Accumulate (MAC) unit using different parallel adder architectures such as Ripple Carry Adder, Carry Look-Ahead Adder, Kogge-Stone Adder, Ling Full Adder and Carry Select Adder.
- Evaluated performance based on speed, delay, area, and power consumption using digital design concepts and simulation tools.

Home Automation using Arduino Uno & Bluetooth Moudle

- The main objective of this project is to control basic household electrical appliances such as lights,fans and other electronic devices using Smartphone wirelessly.
- It allows users to turn devices ON and OFF from their smartphone without touching any switches. This system is simple,low-cost and useful for making homes Smarter and more convenient.

LED Distance Indicator Using Arduino Uno

- This project visually shows the distance of an object by turning ON different LEDs based on the how close the object is to the sensor.
- This project is simple distance measuring and indication system.This project shows how we can measure distance using an ultrasonic sensor and display the result using LEDs .

EDUCATION

2023-2026	B Tech in ECE at **Anantha Lakshmi Institute of Technology and Sciences**	(GPA : 8.26/10)
2020 -2023	Diploma in ECE at **GOVT.Polytechnic-Ananthapur**	(GPA : 9.4/10)
2019 -2020	Class 10th at **BSR MPL High School (Boys)**	(GPA : 10/10)

CERTIFICATIONS / ACHIVEMENTS

- VLSI Short-Term Internship – Short term Internship (ExcelR EdTech)
- Embedded System Developer – Virtual Internship (AICTE–EduSkills–Microchip)
- Python Full Stack Developer – Virtual Internship (AICTE–EduSkills)

SKILLS

- **Programming Languages** : C , Embedded C , Python
- **Tools** : Keil µVision, Proteus ISIS, Flash Magic
- **Microcontrollers** : LPC2129, 8051
- **Concepts** : Pointers, Structures, Functions, File Handling, Dynamic Memory Allocation. GPIO, Timers, Interrupts, ADC, LCD Interfacing, Keypad Interfacing and 7-Segment Display Interfacing.
- **Soft Skills** : Problem-Solving, Analytical Thinking, Team Collaboration, Presentation Skills
